IT'S A WRAP!

The Malaysia's first ENGINEER and MARVEX has set the pace for growth, expansion and modernisation.

ENGINEER and MARVEX 2022, the first Engineering and ACMV&R trade exhibition and conference has exceeded expectations as a place to Connect, Experience and Learn.

Making a remarkable debut, it featured the industry's best technology, geared to green the planet and accelerate the government's vision of achieving nett zero Green House Gas emission by 2050.

Held over 4 days, exhibitors connected with a constant flow of professionals, trade visitors, consultants, specifiers, contractors and developers to kick-start the economy and to rejuvenate the industry after two years of lockdown.

4 DAYS. 1 SINGLE VENUE, WE WELCOMED:

5,247 Visitorship

1,428 Buyers

HEAR WHAT THEY SAY!

YB Dato' Sri Haji Fadillah Yusof
Senior Minister, Ministry of Works, Malaysia

As we transition into an endemic state, it is imperative for us to revive our economy and return to normal. Moving into the economic recovery phase, construction remains a key industry due to its economic multiplier effect. It is critical for us to leverage on the technological competencies and capabilities of our engineers and technocrats in order to drive us to a higher level of productivity, efficiency and be more globally competitive. I hereby urge everyone to take this opportunity to learn, share and adopt the best technologies at ENGINEER and MARVEX. *(Read by Datuk Arthur Joseph Kurup, Deputy Minister of Works, Malaysia)*

YB Datuk Ir. Haji Mohamad Zulkefly bin Sulaiman
Deputy General, Jabatan Kerja Raya

This is the first time an exhibition like this has been organised. It is a very good platform for engineers, contractors and consultants to know new things and new technology. It is the best way to get new additional information and update on the latest designs so that we are more competitive and technology based.

Ir. Ong Ching Loon
IEM President (2020 – 2022)

Malaysia has always been seen as a country with an engineering mind. Our thought leadership in technological innovation has always been internationally recognised. Engineer 2022 is a statement to the world that we are ready to come back and show the world what we are capable of.

Mr. Peter Tan
MACRA President (2020 – 2022)

I've been very excited since the inception of ENGINEER & MARVEX. Finally, it kicked off and it's a success. We saw tremendous crowd across the four days and it has been a fantastic exhibition that will return bigger next year, with international elements!

Ir. Yau Chau Fong
Organising Chairman of ENGINEER 2022

ENGINEER was fantabulous! It is a dream come true for us, and this is the one and only exhibition in Malaysia that exhibits engineering technology. I have seen a lot of engineers, developers, contractors and those involved in engineering appreciate what was on display.

Mr. Danny Chang
Organising Chairman of MARVEX 2022

We waited so long for this exhibition to happen, after 2 years of postponing, so we are very pleased to see how successful it has turned out to be. We are also very grateful to all the exhibitors who patiently stuck it out with us, and most of them are waiting for next year's exhibition, which will be bigger and better.

WHAT WE'VE HEARD ON THE FLOOR!

FROM VISITORS:

It has been helpful for me to collect information especially on HVAC and energy saving technologies.

*Mas Arman Sugindi,
Principle Engineer,
Petronas*

The expo is very interesting and there are a lot of exhibitors. The cocktail is a game-changer, as we have not had this in a long while. The Engineering fraternity has not met in the past two years, and this is necessary to bring people together, to bring together industries, consultants, players, stakeholders and everyone that is involved.

*Ir. Terjinder Singh,
Advisor / Past Chairman, Information and
Communications Technology Special Interest Group,
Committee Member CESIG / EETD and IEM Member*

This exhibition has inspired me with new ideas and provided valuable market trend insights. It's a big deal for us because it's crucial to be in the know of the latest technology in the market to stay ahead. I came to this exhibition to look for better energy efficiency products specifically within the mechanical line and I found this exhibition helpful in finding these products and learning more on what is out there in the market.

*Yusran Ariff,
Project Manager,
Tropicana Corporation Berhad*

Being in the engineering environment, it's good to come out and socialise. I came to learn more about innovative products and it has been a fruitful visit to say the least. You can do only so much being online but it's when you meet people in person to do business then you can communicate more effectively. I feel the same about product demonstration, it's crucial to see the product in person to gain a greater understanding of its capabilities and exchange ideas with the people you meet.

*Walter Lloyd Perera,
Partner Development Manager,
TomTom*

We are here to look for innovative, new technologies for the navy, and we prefer locally developed ones. We have engaged with many vendors and invited them to do some talks. It is a job well done to the organisers. The marine industry is big and our engineering core deals with things like this, and this is a huge opportunity for us. We have also invited our colleagues to attend.

*Cdr. Mohd Sabri bin Ahmad &
Cdr. TS Matthew R. Alexander,
Engineers,
Royal Malaysian Navy*

This event has been eye-opening because I am seeing so many innovative products on display here. I am glad I took the opportunity to attend the exhibition. I was impressed by the Covid-19 Aircond Filters available, I think it's an excellent product as we move into the endemic phase and place greater importance to safeguarding our health.

*Jacquelyne Anne Boudeville,
Mechanical Engineer,
Duriane*

FROM EXHIBITORS:

We are honoured to be here. As a company that has been known as the number one major appliances manufacturer, this accolade reaffirms our position in the market. We are proud to have our technology recognised for its energy efficiency and innovation in ENGINEER & MARVEX 2022.

*Leong Har Wai,
Assistant Director,
B2B, Haier Electrical Appliances Malaysia,
MARVEX ACMV&R Excellence Award 2022 Winner*

We've been in trade shows for about 10 years, and each time we're here, we continue to actively contribute to a greener and cleaner world. I'm also happy to have successfully organised the First Midea International HVAC Design Contest in this exhibition. We have met our objectives to become the catalyst to develop talents and to encourage the creation of high-quality design works for the industry with a fair number of professional engineers, contractors and students joining the contest.

*Ng Kong Chin,
President,
Midea Scott & English Electronics (MSEE)*

This is our first exhibition in Malaysia and we are glad to be part of this exhibition. We found the response to our booth to be very receptive and we are meeting our target customer-base including consultants, developers and contractors. Thanks to this exhibition, we have built a valuable relationship with our potential customers.

*Alex Ong,
Senior Manager,
Leo Pump Engineering Malaysia*

This exhibition is truly an energetic experience. We feel the positive energy from the exhibition & visitors who come with the intention to do business. This energy allows us to share more about what Malakoff's has in the pipeline to promote our rebranding initiative. We are excited to be a part of the exhibition where we can make more people aware of our position as a major player in the renewable energy sector.

*Abdul Manaf,
Manager, Portfolio and Asset Management,
Malakoff*

This exhibition has been very successful in attracting the right customers given the pandemic situation. Seeing these feedback gives me a lot of confidence in the growth of ENGINEER.

*Winson Teh,
Managing Director,
Swift Home Lifts Sweden AB*

I am glad we participated in ENGINEER 2022 as we managed to meet our potential customers face-to-face and demonstrate our products and the value it would bring to their electrical needs.

*Ammir Ilyia,
Sales Manager,
Emerson Professional*

This is a good platform for local companies to showcase what they do and provide technology updates. We need to know what is in the market and what is the technology moving forward. I do foresee this exhibition getting bigger in the future.

*Hiew Jia Sin,
Project Sales Engineer, Project Sales Department,
Mitsubishi Electric*

We just feel amazed about this entire exhibition. The crowd are in high spirits, inquisitive and relevant to our line of work.

*Koo Zao Cheong,
Manager,
Regional Business Development, Waterco*

KUALA LUMPUR CONVENTION CENTRE

Raw Space

- Raw Space Only without any Fittings
- Design, Construction and Fittings to be Borne by Exhibitor

Shell Scheme

Each stand is complete with:

- White Melamine Dividing Panels / Partition
- 1 Set Company Name on Fascia Board
- Needle Punch Carpet
- 1 Information Desk & 2 Chairs
- 2 Units Spot Light
- 1 Unit 13 Amp Power Point
- 1 Unit Waste Paper Basket

EXHIBIT SPACE RATES

EXHIBITION RATE	RATE (RM)
RAW SPACE (per sqm)	RM1,220.00
SHELL SCHEME (per sqm)	RM1,300.00
Prime Lot (per unit)	Additional RM800
Front Lot (per unit)	Additional RM600
Corner Lot (per unit)	Additional RM600

Prices shown are inclusive of SST

ENGINEER & MARVEX 2023 will be driving engagement through a one-stop event that redefines the future.

Take your products and solutions to the next level.

Be a part of this exhibition to connect with the Engineering and ACMV&R industries and leverage on emerging opportunities!
